SCHOOL

Liceo "Carmine Sylos"

Our school is set in Bitonto, a village in the south of Italy, not far from the sea and from the chief city of Apulia, Bari. It's one of the oldest High Schools in Italy!! It was founded in 1865.

Here we are, on the stairs of our school entrance !

α

ϕ

Classical High School

→
Our specific school subjects are Latin and ancient Greek: we translate texts from Latin and Greek into Italian.

σ

starting from the 3rd year we have a deep approach to literature and to the writers'

ρ

thought

β

can you read these letters of the ancient Greek alphabet?

Traditional

Cambridge Classical High School

In addition to the traditional classical curriculum,
we have "Cambridge" courses of Physics, Maths
and English literature in English language in
order to pass the international IGCSE Cambridge
exams

Authorised Exam Centre

English qualifications

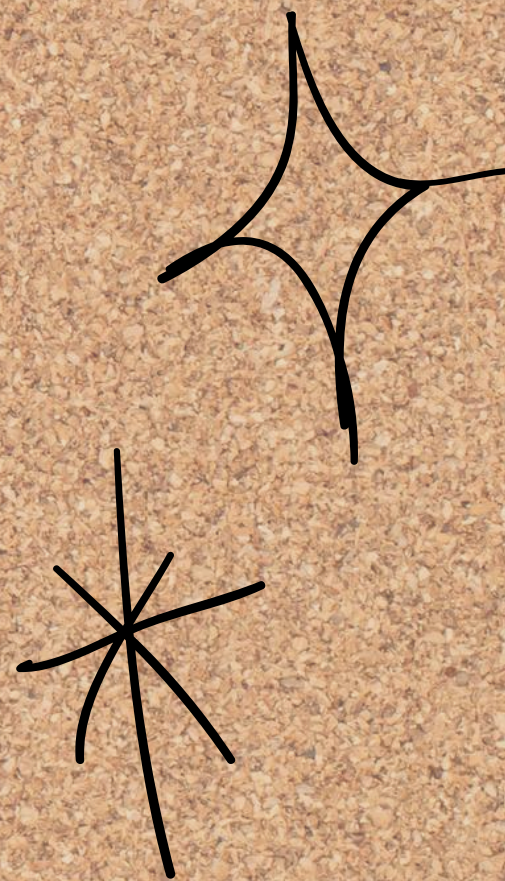

BIOMEDICAL

Classical High School

goal

In our school there is also a biomedical course, where students study both Latin and Greek, but they have **additional hours of Maths and Chemistry**, which they use to go to the laboratory. Thanks to this course, starting from the third year, students can live experiences in pharmaceutical industries and they have the opportunity to become part of the world of medicine even before university.

Linguistic High School

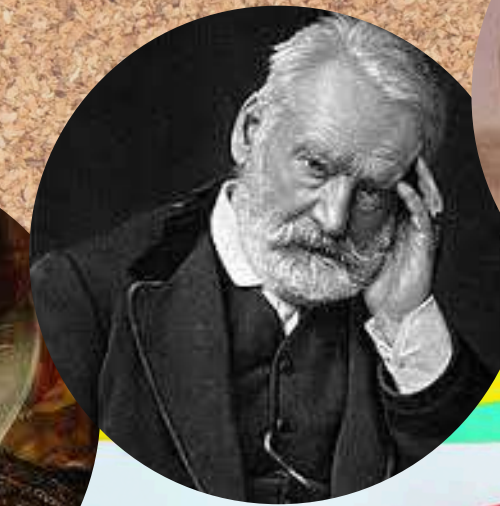

From the first year we study 3 foreign languages: English, French and then you can choose the third one between Spanish and German.

For every language there is the weekly support of a mother tongue teacher, who helps the students to improve their language competences

→ Objective 1: language certifications

← Objective 2: new cultures

During the last three years we study the specific literature, history and culture of the countries related to the languages chosen

Human Sciences

High School

Specific subjects
The specific subjects
of this section are
Latin and Human
Sciences.

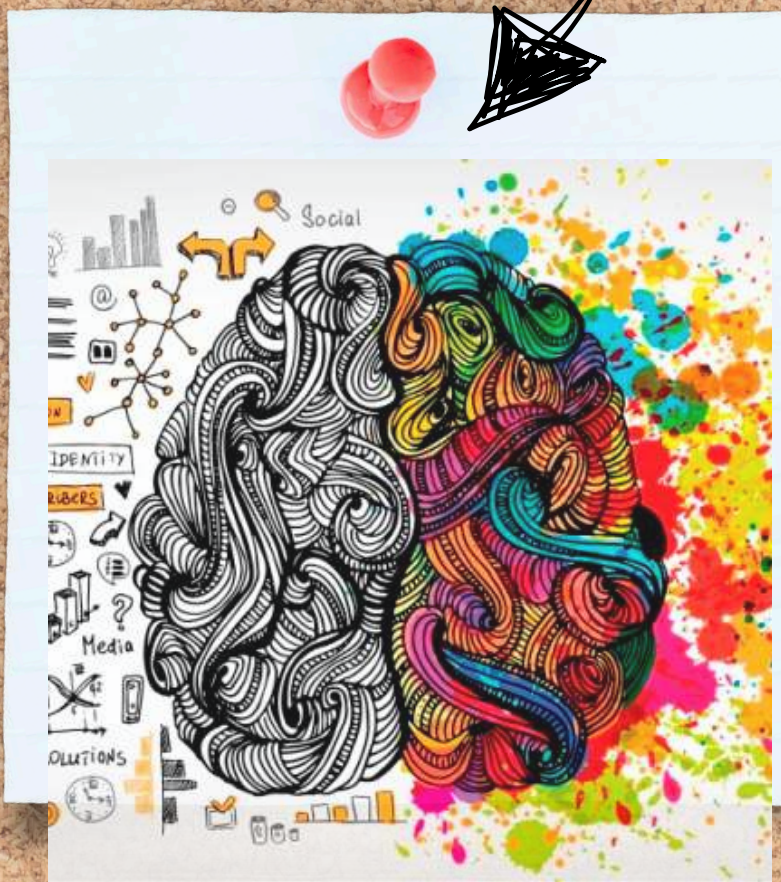

Sociology
the study of the
society

Psychology
the study of
the mind
